

JOYAL BINSU

B.Tech, Computer Science Engineering (AIML) | Batch 2023–27 | **CHRIST (Deemed to be University), Bengaluru**
joyal.binsu@btech.christuniversity.in • +91 8547256322 • [LinkedIn](#) • [GitHub](#) • Bengaluru, Karnataka

PROFESSIONAL SUMMARY

A driven Computer Science Engineering student (AI/ML, Honors in Cybersecurity) with hands-on experience in threat detection, vulnerability assessment, and security tool deployment across live industry environments. Proficient in network analysis tools including Nmap and Wireshark, with practical exposure to malware analysis via MobSF and APK threat detection using ML-assisted feature extraction. Developed an AI-powered chatbot and a fake APK detection system achieving 85–90% accuracy, demonstrating applied security engineering skills. Seeking a role to contribute to proactive threat mitigation and incident response.

WORK EXPERIENCE & INTERSHIPS

Cezen Technologies Pvt. Ltd., Bangalore

April 2026 – May 2026

Cybersecurity AI Intern

- Conducted hands-on security assessments using 5+ industry tools including network scanners and threat mitigation frameworks, contributing to vulnerability identification in a live environment.
- Performed vulnerability scans and threat mitigation using Linux-based security tools (Nmap, Wireshark) in a live network environment.
- Engineered and deployed an AI-powered chatbot integrated into the company's security operations workflow, reducing average customer query response time by 40% and automating tier-1 triage.

Soften Technologies, Kadavanthara, Kochi

April 2025 – May 2025

Summer Intern – Full Stack Web Development Intern

- Designed and implemented a secure backend architecture with optimized database schema, reducing data redundancy by 30% and improving query performance across a production web application
- Developed RESTful APIs and server-side logic with input validation and error handling, applying secure coding practices to ensure data integrity and safe storage.

PROJECTS

Fake APK Detection System – APKShield | Python, API, MobSF, Frontend, Linux

Nov 2025 – April 2026

- Developed a cybersecurity-focused system to detect malicious or fake Android APK files by analyzing permissions, metadata, and behavioral indicators.
- Built Bash automation to deploy a Flask-based Android malware analyzer as a hardened Linux service: systemd sandboxing (least-privilege service user, restricted filesystem/memory permissions), UFW firewall + fail2ban intrusion prevention against brute-force logins, and an inotify-driven SHA-256 integrity-monitoring pipeline providing tamper-evident chain of custody for uploaded files.
- Implemented feature extraction and rule-based / ML-assisted analysis, achieving 85–90% detection accuracy across 50+ APK samples while reducing false positives through iterative testing.

Internal Co-ordination Platform – EventOps | React, JavaScript, REST API, MySQL

Ongoing

- Built a full-stack event coordination platform (10,000+ lines, React 18 + Node.js + MongoDB) with role-based access control across 5 permission levels and real-time collaboration via WebSockets.
- Integrated a Groq-powered AI assistant (LLaMA 3.3-70B) with live database context, enabling natural language task creation, Kanban board management, and cross-channel messaging within the platform.

AI Knowledge Chatbot (RAG-Based) | Python, RAG

Dec 2025 – Feb 2026

- Built a Retrieval-Augmented Generation (RAG) chatbot to answer domain-specific queries from institutional website data and documents..
- Implemented web scraping, text chunking, embedding generation, and vector search for context-aware responses.

Daily Coding Challenge | Python, HTML, CSS, JAVASCRIPT

Dec 2025 – Feb 2026

- Implemented a role-based system for Student, Teacher, and Admin using Google Sheets as a backend integrated with HTML and JavaScript.
- Developed a web-based dashboard to analyze daily coding challenge statistics, tracking attempts and scores across 50+ test entries.

SKILLS

Technical: JavaScript, Python, C, HTML, CSS, React, Flask, FastAPI, RESTful API Development, MySQL, MongoDB, Linux, Shell Scripting.

Tools: Git, Docker, Nmap, Wireshark, MobSF, Kali Linux, Ubuntu, GitHub

Domain: Data Structures & Algorithms, Object-Oriented Programming, Cloud Computing. Network security, Machine Learning, AI, NLP, Malware Analysis, Operating Systems, Cybersecurity, Internet of Things

Soft Skills: Problem Solving, Leadership, Analytical Thinking, Team Collaboration, Communication.

Languages: English | Malayalam

CERTIFICATES

Machine Learning with Python

July 2025 – Sept 2025

Networking Service (Infosys)

Dec 2025 – March 2025

CO-CURRICULAR & LEADERSHIP

Association of Christian Christites, CHRIST University, Bengaluru

Jun 2025 – Apr 2026

Campus Coordinator

- Led a 36-member core team with over 500 students, handling well over 10+ events and sessions.

Anvesha 2025 & 2026, CHRIST University, Bengaluru

Jun 2025 – Apr 2026

Publicity and Logistics

- Coordinated the campus fest as Publicity Head and Logistics Head, bringing over 1500+ students onto campus and handled the logistics for the event.

ACHIEVEMENTS & AWARDS

• Merit Scholarship.	April 2026
• Co-curricular Scholarship.	April 2026

EDUCATION

CHRIST (Deemed to be University), Bengaluru Btech — Computer Science and Engineering(AI ML) (Honors in Cyber Security) CGPA: 8.9 / 10.0	<i>Jun 2023 – May 2027 (Expected)</i>
St. Antony’s Public School, Anakkal, Kanjirapally, Kerala Class XII - 86%	<i>Jun 2021 – Apr 2023</i>
Indian Central School, Kuwait Class X — 91%	<i>May 2021</i>
